SUMMARY

Computer Science and Business Systems undergraduate graduating in 2027 with hands-on experience in building AI-powered applications, web platforms, and data-driven solutions. Skilled in Python, JavaScript, React, FastAPI, and PostgreSQL, with experience in AI integration, demand forecasting, data analysis, and natural-language querying. Interested in exploring AI tools, automating repetitive tasks, and building practical solutions that simplify workflows and improve productivity.

EDUCATION

SRM Institute of Science and Technology 07/2023 – 05/2027 | Chennai, India
B.Tech in Computer Science and Business Systems

Vidya Niketan, Senior secondary school 07/2019 – 05/2021 | Patna, India

EXPERIENCE

CodeAlpha | Frontend Development Intern 10/2025 – 11/2025 | Remote

- Delivered 3 web interfaces using React.js, HTML, CSS, and JavaScript to provide consistent experiences across desktop and mobile devices.
- Collaborated across 12+ Git/GitHub feature branches, coordinating CI/CD workflows and streamlining code integration.
- Crafted 8 React components and technical documentation to support consistent implementation across project features.

PROJECTS

AIBI-DSS – AI Business Intelligence & Decision Support System 08/2026

- Engineered enterprise business intelligence platform supporting Six business functions (Sales, Inventory, Orders, Customers, Suppliers and Expenses) with 11 table PostgreSQL database.
- Constructed analytical modules for KPI analysis, sales growth analysis, demand forecasting, and business health scoring, using 6 months of business data.
- Built an AI two-service system with FastAPI, Prophet, pgvector, and Gemini to enable natural language querying of business data across 6 functions with source information retrieval and response generation capabilities.

Tech Stack: Java, Spring Boot, Python, FastAPI, React, TypeScript, PostgreSQL, pgvector, Prophet, Docker

Smart Municipal Management System 04/2026

- Developed a civic issue platform with 3 user types: Citizen, Worker, and Admin for submitting, assigning, tracking, resolving, proof, feedback, and notifications.
- Secured complaint data with JWT authentication, bcrypt.js password hashing, and RBAC, while enforcing role-based ownership access and validation across four priority and 4 status levels.
- Used PostgreSQL, Leaflet JS, and Chart JS to visualize complaint distribution, complaint status and priority, and location-based worker activity across 3 views.

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, JWT Authentication, Leaflet.js, Chart.js, Vite.

Garbage Detection System 09/2025

- Implemented a modular Python data pipeline integrating detection, geo-tagged reporting, and MongoDB persistence, achieving 99.5% data accuracy.
- Reduced false positives by 15% through iterative debugging and pipeline optimization.

Tech Stack: Python, Flask, YOLOv8, OpenCV, MongoDB, Geopy, OpenWeather API, Matplotlib, HTML, CSS, JavaScript.

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Java
- **Machine Learning & AI:** LLM Integration, RAG, Gemini API, AI-Powered Applications, Demand Forecasting
- **Databases:** SQL, PostgreSQL, MySQL, MongoDB, Joins, Subqueries, ANSI SQL
- **Frameworks & Technologies:** React.js, FastAPI, Node.js, Express.js, REST APIs
- **Software Engineering:** Data Structures & Algorithms, Object-Oriented Programming, SDLC, Testing, Debugging
- **Cloud & Tools:** AWS, Google Cloud, Git, GitHub, Docker, CI/CD, Postman

ACHIEVEMENTS & CERTIFICATIONS

- Solved 260+ DSA questions on LeetCode and GeeksforGeeks.
- Shortlisted for TECHgium 9th Edition by Larsen & Toubro.
- Oracle AI Cloud Database Services 2025 Certified Professional
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional.
