PROFILE

Computer Science and Business Systems undergraduate at SRM Institute of Science and Technology with experience in AI, full-stack development, and database systems. Skilled in Python, JavaScript, React, and SQL, with hands-on experience in machine learning and REST API development. Passionate about building technology solutions to solve real-world problems.

SKILLS

Programming Languages: Python, Java, C++, JavaScript

Web Development: HTML, CSS, React.js, Node.js, Express.js, REST API Development

Libraries & Technologies: Pandas, NumPy, OpenCV, YOLOv8, Flask

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman, XAMPP, pgAdmin, Command Line Interface, Google Cloud

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Time Management

EDUCATION

B.Tech in Computer Science and Business Systems,

Jul 2023 – May 2027 | Chennai, India

SRM Institute of Science and Technology

High School, Vidya Niketan

Jul 2019 – Jun 2021 | Patna, India

PROJECTS

Smart Municipal Management System 🔗

Apr 2026

- Developed a full-stack Smart Municipal Management System using React, Node.js, and PostgreSQL to manage and track civic complaints.
- Designed RESTful APIs and backend services for complaint handling, user management, and admin operations.
- Built interactive dashboards and features including real-time complaint tracking, notifications, maps (Leaflet), and analytics (Chart.js).
- Integrated advanced functionalities such as image upload, GPS location tracking, and speech-to-text input for enhanced user experience.
- Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, JWT Authentication, Leaflet.js, Chart.js, Vite

PathByte – AI-Powered Learning Roadmap Platform 🔗

Jan 2026

- Developed an AI-powered platform to generate personalized learning and career roadmaps based on user goals and market trends.
- Designed and implemented a PostgreSQL database schema with optimized queries to ensure data integrity and performance.
- Built a responsive React frontend integrated with RESTful APIs for dynamic visualization of learning paths and progress tracking.
- Collaborated in a 3-member team, contributing to both frontend and backend development.

Tech Stack: JavaScript (ES6+), React, Express.js, PostgreSQL.

Garbage Detection System 🔗

Sep 2025

- Developed an AI-based waste detection system using YOLOv8 and Flask to identify garbage from real-time video streams for municipal monitoring.
- Designed a modular detection pipeline and integrated geo-mapping dashboards to visualize pollution zones and analytics.
- Improved data interpretation to support environmental monitoring and municipal decision-making.

Tech Stack: Python, Flask, YOLOv8, OpenCV, MongoDB, Folium, Geopy, OpenWeather API, Matplotlib, HTML, CSS, JavaScript.

CERTIFICATES

Oracle AI Cloud Database Services 2025 Certified Professional 🔗

Earned Oracle certification demonstrating skills in Oracle AI Cloud Database Services and database management on Oracle Cloud Infrastructure (OCI).

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional 🔗

Learned to build and deploy LLM-based applications using OCI Generative AI, including RAG and semantic search techniques.

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Developed and deployed a personal finance app (“Paisa”) and actively use it for daily expense tracking, demonstrating real-world usability and practical impact.
- Shortlisted for the Presentation Round in TECHgrium 9th Edition, a national-level innovation competition organized by Larsen & Toubro, for proposing a technology-driven solution to an industry problem.
- Volunteered in Community Connect Program, teaching school students about basic technology concepts and digital awareness.
